INTRODUCTION

This is the fifth comprehensive Census of Merchandising and Service Businesses taken in Canada and the first on a quinquennial basis. All known businesses within the scope of the census were surveyed although less detail was requested than for the 1961 Census.

The census covers all retail, wholesale and service businesses, with the following general exceptions: retail trade excludes non-store trade such as direct selling by mail (but not catalogue sales of department stores) and door-to-door, as well as retailing carried on as a minor activity by other businesses such as manufacturing, contractors, service establishments, etc.; services exclude those relating to education, health and welfare, most professions, finance, transportation, government, and trade and labour organizations. The census is conducted as a mail survey and is based on the list of all businesses prepared in June 1966 by census enumerators; this is augmented by a list of new business registrants for unemployment insurance in the last half of the year and by checking trade association publications and various other lists.

Coverage changes

One of the basic functions of this census is to measure consumer spending in the service sector of the economy. In the past some segments of the service industry, the non-profit organizations, were not covered by the census even though they were in direct competition with commercial businesses and absorbed a considerable portion of the consumer expenditure. In order to give a more complete measure of this expenditure flow, in this census, non-profit organizations were included with commercial enterprises of the same kindof-business classification, e.g., golf courses. The inclusion of these units resulted, in some instances, in a loss of comparability with 1961 and, in some cases, accounted for substantial increases in the numbers and the revenues reported. Other factors which significantly improved the data in 1966 relative to 1961, were a better list of service enterprises which served as the basis for the 1966 survey and improved survey techniques that made more accurate classification of a business possible.

Definitions

Statistics on merchandising and service businesses are presented under two concepts "Location" and "Establishment". Location statistics show every separate place of business in its own classification, while establishment statistics comprise the accounting entity based on its major activity. For example, a firm operating a wholesale and a retail hardware business from two separate locations would be classified in its entirety as a wholesale hardware establishment if the wholesale operations predominated; for location statistics, however, the retail store would be classed as and included with retail trade, the wholesale location with wholesale trade. A business location may be within the scope of the census, but the establishment of which the location is a part may not be within scope.

Outline maps of counties and subdivisions of each province and of metropolitan and major urban areas may be obtained by ordering Census Bulletin 1-16, Catalogue No. 92-616. Maps showing census tracts of metropolitan areas are included in the Census Tracts Series.

Nous avons réuni dans le présent volume les résultats du cinquième recensement complet des entreprises qui s'occupent de commerce et de services, recensement qui est en même temps le premier recensement quinquennal de cette nature effectué au Canada. Toutes les entreprises connues qui entraient dans le champ du recensement ont été recensées, bien qu'on ait demandé moins de détails que pour le recensement de 1961.

Le recensement embrasse tous les établissements de vente au détail, de vente en gros et de service, à certaines exceptions près: la vente au détail ne comprend pas le commerce qui se fait hors du magasin comme la vente directe par la poste (mais bien les ventes par catalogue des grands magasins) et le porte à porte, non plus que la vente au détail effectuée à titre d'activité secondaire par les industries manufacturières, les entrepreneurs de construction, les établissements de service, etc.; les services ne comprennent pas l'enseignement, les services de la santé ni les services sociaux, ni la plupart des professions libérales, les finances, le transport, l'administration publique, ni les organismes syndicaux ou ouvriers. Le recensement se fait par la poste et utilise la liste des entreprises commerciales dressée en juin 1966 par les agents recenseurs; on ajoute à cette liste les nouvelles entreprises enregistrées par les Bureaux d'assurance-chômage dans la seconde moitié de l'année. On puise également dans les listes publiées par les associations de commerçants et par d'autres organismes.

Modifications apportées à la couverture

.Un des rôles fondamentaux de ce recensement est de mesurer les dépenses à la consommation intéressant le secteur économique des services. Dans le passé, certaines branches de l'industrie des services, à savoir les organismes sans but lucratif, n'étaient pas couvertes par le recensement même si elles faisaient directement concurrence aux entreprises commerciales et absorbaient une partie importante des dépenses à la consommation. Lors du recensement de 1966 on a inclus les organismes sans but lucratif dans les entreprises commerciales exploitant le même genre de commerce, e.g., les terrains de golf, afin de donner une évaluation plus complète de ces dépenses. Dans certains cas l'introduction de ces nouvelles unités a eu pour effet de rendre impossible la comparaison avec 1961, ou encore d'entraîner une augmentation considérable des chiffres et des montants de recettes déclarés. Parmi les autres facteurs qui ont contribué à une amélioration sensible des données de 1966 par rapport à 1961, signalons l'emploi d'une liste plus complète des entreprises de service pour le dénombrement de 1966, et de techniques d'enquête perfectionnées permettant une classification plus exacte des commerces.

Définitions

La statistique des établissements de commerce et de service est présentée sous un double point de vue: celui du "Local d'affaires" et celui de l'"Établissement". La statistique des locaux d'affaires situe chaque maison de commerce dans sa propre catégorie, tandis que la statistique des établissements tient compte du siège de la comptabilité et le classe suivant l'activité principale. Ainsi, par exemple, une firme qui exploite un site de quincaillerie en gros à tel endroit et un commerce de quincaillerie en gros si le commerce de gros prédomine; au point de vue, toutefois, des locaux d'affaires, le magasin de détail est classé comme commerce de détail et compris dans cette catégorie, le magasin de gros étant classé dans la catégorie des commerces de gros. Un local d'affaires peut être compris dans le cadre du recensement, sans que l'établissement dont il dépend y soit nécessairement.

On peut se procurer des cartes de contours des comtés et subdivisions de chaque province ainsi que des zones métropolitaines et grandes agglomérations urbaines en commandant le bulletin de recensement 1-16, numéro de catalogue 92-616. Les cartes indiquant les secteurs de recensement des zones métropolitaines sont comprises dans les rapports de la Série des secteurs de recensement.
